PRIVATE LABEL PHYTOCERAMIDES

with Ceramide - PCD® From Oryza

AMAZING SKIN, HAIR & CELL Renewal*

We combined patented and gluten free phytoceramides from rice, along with Vitamins A, C, D, & E for a revolutionary approach to skin care. The key is Ceramide-PCD from Oryza. This all-natural, rice-based ingredient strengthens your cells and allows your skin to retain more moisture, naturally where you need it.*

An alternative to a facelift may be as simple as taking this PhytoCeramide formula. Supporting beauty from the inside out, our exclusive formula may help to reduce fine lines and wrinkles and improve the structural integrity of the skin. Taken orally it improves the cells you see, as well as those you don't see within your body. Once taken as directed, cracked and damaged skin is moisturized. Cells throughout your body rebuild, rejuvenating you from the inside out. Clinical tests of the active ingredient, Ceramide-PCD, measured an improvement in moisture retention and appearance with a decrease in dryness and roughness. The bottom line is our supplement does what no lotion or cream can. It works with your body to improve the look and feel of your skin, hair and even your other cells within.*
